	Examiner Paul B. Prebilic	Art Unit 3774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 22, 2008 has been entered.

Election/Restrictions

Claims 4-9, 12, 15, and 30-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions or species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 31, 2007.

Claim Objections

Claim 1 is objected to because of the following informalities: on line 9 of claim 1, "extended" should be ---extending--- to be grammatically clearer. Appropriate correction is required.

Upon careful consideration of the amendment filed December 22, 2008, the Examiner concluded that Pavcnik still reads on the claimed invention because the first, second and third portions of the strut need not be entirely solid materials but can include loops.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 10, 11, 13, 14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Pavcnik et al (WO 99/62431). Pavcnik anticipates the claim language where:

- the frame as claimed is the frame (11) of Pavcnik (see Figures 10, 11, 12, 15, and 16); the first portion as claimed is the straight portion (13) of the frame (11), and the second and third portions as claimed are the bends (12) or the fillets (42) with the curves (63) on either side thereof (see Figures 5 or 11); the widths of the second and third portions are taken at a 45 degree angle (Figure 11); with this understanding, the widths of the second and third portions are clearly greater than the straight sections;
- the graft as claimed is the covering (57) and its edge is clearly in contact with the frame; see Figures 14-16 (see the marked up figure below);

- the attachment element as claimed is the suture (50); see page 7, line 30 to page 9, line 7.

With regard to claim 3, see Figure 11 for curvilinear and straight portions.

With regard to claims 10 and 11, collagen and small intestinal submucosa are types of extracellular matrix material; see page 7, line 30 to page 8, line 3.

With regard to claims 13 and 14, the Applicants are directed to page 8, lines 7-9 of Pavcnik.

With regard to claim 16, the angle as claimed can be zero degrees and still fall within the scope of the claims.

Response to Arguments

Applicant's arguments filed December 22, 2008 have been fully considered but they are not persuasive. The Examiner has modified the rejection to explain how the claims are now being interpreted. In particular, the strut need not be a straight solid material but can include curves therein. The curves make the strut portion wider than a

Art Unit: 3774

straight portion by virtue of the area that the portion traverses. For this reason, the rejection has been maintained with modifications.

Conclusion

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
